DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 includes the recitation "a first connecting member to the shield" it is unclear what is meant by this recitation, i.e. is there a first connecting member on the shield or does the first connecting member connect another element to the shield.

3. Claim 6 recites the limitation "the tab" in lines 3-4; "the pocket" in line 4; and "the gap" in line 5. There is insufficient antecedent basis for these limitations in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-13 are rejected as best understood under 35 U.S.C. 102(b) as being anticipated by Lepp et al.

The grain bin sweep disclosed by Lepp et al. includes an auger assembly 30 including a shield 72; a tractor drive frame assembly 13 having a front support beam 16,

a pair of spaced apart truss sections 36, 37; and a rear support member opposite support beam 16.

6. Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Jiskoot.

The grain sweep including an auger assembly including a shield 12 and an auger 10; a tractor frame assembly including a first part 12 and a frame second part 33; a first connecting member on the auger assembly and a second connecting member on the frame assembly wherein the connecting members are matable together to connect the frame assembly to the auger assembly (figure 3).

Allowable Subject Matter

7. Claims 14-19 are allowed.

8. The following is an examiner's statement of reasons for allowance: a grain bin sweep including the unique features of 'a plurality of pocket members mounted one of the shield and frame, the pocket members including a first pair of spaced apart plates to define a gap between the front and back pocket plates; and tabs extending from the other of the frame or shield' in combination with the rest of the claim language is not taught or fairly suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Olson ('187), Weikel, Jackson ('705), Jackson ('094), Muth, and Olson ('695) are pertinent.
